Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 33-46, drawn to a delivery system, classified in class 623, subclass 1.11.
 - II. Claims 47-55, drawn to an occlusion device, classified in class 623, subclass 1.3.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I. and II. are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not require fuzz, fibers, coatings, or particular materials such as bioabsorbable polymers as claimed in the subcombination. The subcombination has separate utility such as being delivered by balloon or self expanding catheters and may function as a stent, filter, or filling device alone and does require the delivery device particulars.

3. Because these inventions are distinct for the reasons given above and the search required for Group II. is not required for Group I., and the search required for Group I. is not required for Group II., restriction for examination purposes as indicated is proper.

4. A telephone call was made to Todd Messal (registration no. 42,883) on September 23, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
